Areas of Focus & Expertise

- Pension Administration Systems
- Business Analysis
- Business Process Management
- Workflow Automation
- System Integrations
- Technical Writing

I have nearly a decade of experience working in the pensions industry – working both within pensions systems and pensions administration. In addition, I spent 6 years as a system analyst overseeing a variety of development and administration responsibilities including Linux administration and custom web development.

With extensive business analysis skills, I play an integral role in the designing of software system features, and the design and implementation of workflow automation to reduce processing times and cost and increase accuracy and consistency. I effectively communicate technical concepts to non-technical stakeholders, and successfully on-board and train end-users of systems and business processes.

Having recently moved to the Lake District in England, I enjoy exploring the region, or catching up on American Football, European Football, or trying my hand at leading a football club to glory in Football manager.
